Tradition plays an important role in the success of Siegel & Dolt Comprehensive Dental Care. Founded in 1962 by Dr. Harris B. Siegel's father, Dr. Alvin P. Siegel, the practice is still guided by the same old-fashioned values and integrity. “We continue to see the families, both the children and grandchildren, of many patients that were first seen in the practice more than 40 years ago,” Dr. Skip Dolt says, adding, “We are extremely fortunate to continue to foster a unique, relationship-driven practice that puts people first.”

When entering Siegel & Dolt Comprehensive Dental Care, patients are greeted by a soothing salt-water aquarium, complimentary beverages, calming music, a video of America's national parks and access to an Internet café equipped with wireless technology for convenience. “One of the things that people feel when they walk in the door is the strong emphasis we place on being both state-of-the-art and relaxing,” Dr. Siegel says. The feeling continues throughout the office as you walk past a waterfall to get to the treatment rooms, each of which hosts a tree-top view and a personal flat-screen television with your choice of viewing pleasure.

Drs. Siegel and Dolt, who met while completing two post-doctoral programs at the University of Texas at San Antonio, are both Fellows of the Academy of General Dentistry. They are also members of the Academy of Osseointegration, the American Academy of Implant Dentistry, the American Association of Cosmetic Dentistry, the American and Georgia Dental Associations and the Hinman Dental Society.

Deeply committed to personalized attention and quality dental care, Drs. Siegel and Dolt are also committed to continued advanced training. “To ensure patients are receiving the highest quality care possible, an in-house ceramist meets and customizes veneers and crowns for each patient based on their specific dental needs” Dr. Dolt says. “We don't have a cookie-cutter approach to dentistry,” Dr. Siegel says. “Everyone gets individualized care.”
